iansyst are market leaders and have been providing accessibility and inclusion solutions for over 30 years. Our wealth of experience and product knowledge has empowered over 10,000 disabled individuals in the workplace to maximise their potential and add value for their employers.

We launched our full workplace solutions service in 2009. Since then, we've worked with central and local government, FTSE 100 organisations, banks and financial institutions, councils and some of the most well-known corporations in the world.

Operating at a national level, and with our partners (including Nuance, Texthelp, Claro, Connevans, Online Ergonomics, Lenovo and RBLI), we pride ourselves on supplying outstanding assistive technology and ergonomic equipment, matched with the best training, consultancy and coaching.

complete support for disabled employees

We can work with you to support your existing processes, which may include Access to Work; alternatively our workplace service is the complete accessibility solution, helping organisations support their disabled employees. The simple four-step solution begins with analysing and finishes with complete support and reassurance.

1 — Assessment

Our experienced accessibility specialists will visit your organisation and recommend adjustments by completing a Workplace Needs Assessment as the first step. The specialist will meet your employee at their place of work to understand their role, strengths and difficulties.

At this stage a written report making suggestions for adjustments to benefit the employee will be provided.

2 — Assistive Technology

The workplace needs assessment may advise on the assistive technology available for supporting the employee. iansyst can supply any item; hardware or software, that may be recommended. This helps avoid the inconveniences of sourcing from several different suppliers and ensures the process of providing these products quickly and efficiently. We also offer set up and installation of software on your individual computers or networks.

3 — Employee Support

Whether it is training on the assistive technology, coaching, strategy training or scripting our experts can support your employees at their place of work.

4 — Organisation Support

At iansyst we will continue to be available to offer any support your organisation may need, this includes software updates, technical issues and training support – we are always here for you!

get in touch

To find out more about our workplace solutions and what iansyst can do to help you support your disabled employees, call 01223 420 101 and ask to speak to our commercial team.

“iansyst supply hardware and software to meet the accessibility needs of our customers. We have been able to call upon them for help and support for the everyday, in addition to time sensitive requirements. They have carried out our Access to Work assessments, and followed on to supply the necessary equipment and training, in a timely and professional manner.”
